

17th GRIHA Summit “Innovate to Act for a Climate Resilient World”

3rd – 4th November 2025 | India Habitat Centre, New Delhi

SUMMARY OF THE 17th GRIHA SUMMIT

The 17th GRIHA Summit centred around the theme **Innovate to Act for a Climate Resilient World** scheduled on 3rd – 4th November 2025 at the India Habitat Centre, New Delhi is bringing together **50+ eminent speakers, 8+ technical sessions, and 3 curated exhibit pavilions** to convert climate ambition into on-ground action across India’s built environment and infrastructure systems.

Designed for policymakers, architects, engineers, urban practitioners, researchers, product manufacturers, investors, and academia, the two-day convening focuses on **market mechanisms, policy frameworks, and scalable solutions for a secure, inclusive, low-carbon transition** that protects communities and economies from escalating climate risks.

Plenary sessions spotlight **resilient infrastructure planning, climate pedagogy** to equip the next generation, and **public advocacy** to translate awareness into measurable impact across regions and sectors.

Four thematic tracks deep dive into issues that matters most- **water security** through innovation, and resource optimisation; **decarbonising construction** via sustainable materials and supply chains; **urban air-quality mitigation** through integrated policy, planning, and technology; and **circularity** that turns waste into regenerative opportunity for cities and industries. On the exhibition side, **three exhibit pavilions** feature the best climate-responsive entries from the **Nirmaan architectural design competition**, an **industry advancement gallery of cutting-edge materials and technologies**, and a **live, full-scale Building-Integrated Photovoltaic (BIPV) model** to experience solar-active facades first-hand.

Why attend?

The built environment accounts for significant emissions and resource use demanding rapid innovation paired with resilience to adapt, recover, and thrive amid climate shocks making the 17th GRIHA Summit a decisive platform to forge partnerships, pilots, and projects with actionable outcomes.

Join to exchange knowledge with national and regional leaders, access innovative tools and technologies, and contribute towards shaping policies and markets that accelerate net-zero, nature-positive, and resilient pathways across India’s cities and infrastructure systems.
